Supplemental disclosure with respect to cash flows - note 14.

The notes form an integral part of these condensed consolidated interim financial statements.

1. NATURE OF OPERATIONS

Solomon Resources Limited (the "Company") was incorporated on August 1, 1989 under the laws of British Columbia. The Company is in the business of exploring and developing mineral property interests. The Company has not earned significant revenues from its mineral property interests and is considered to be in the exploration stage. The Company's corporate head office is at Suite 110-2300 Carrington Road, West Kelowna, B.C. V4T 2N6

2. GOING CONCERN ASSUMPTION

The Company's financial statements have been prepared on a going concern basis, which presumes that the Company will be able to realize assets and discharge its liabilities in the normal course of business for the foreseeable future.

Several conditions cast doubt on the validity of this assumption. The business of mining exploration involves a high degree of risk and there is no assurance that planned exploration projects will result in future profitable mining operations. The Company currently has no material assets, no sources of revenue, and has significant cash requirements to meet its administrative overhead, pay its debts, and develop its planned mineral interests. The ability of the Company to continue as a going concern and meet its commitments as they become due, including the acquisition, exploration and development of mineral properties, is dependent on the Company's ability to obtain the necessary financing. Management is planning to raise additional capital to finance operations and continue to procure mineral property interests. There is no assurance that these plans will be successful.

The Company reported a comprehensive gain of \$153,537 for the six months ended January 31, 2014 compared to a comprehensive loss of \$321,066 for the six months ended January 31, 2013, and has an accumulated deficit in the exploration stage of \$31,815,266 as at January 31, 2014 (July 31, 2013 - \$31,978,803). Although the Company has been successful at raising funds in the past through the issuance of share capital and the sale of assets, it is uncertain whether it will be able to continue this financing due to unpredictable economic conditions.

3. BASIS OF PREPARATION

These condensed financial statements are stated in Canadian dollars, which is the Company's functional and reporting currency.

These condensed financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS").

The standards and interpretations within IFRS are subject to change and accordingly the accounting policies for the annual period that are relevant to these condensed consolidated financial statements will be finalized only when the financial statements are prepared for the year ending July 31, 2014.

The condensed consolidated financial statements include the accounts of the Company and its wholly-owned integrated subsidiaries, Avasca Inc. (a dormant British Columbia company), Valhalla Minerals U.S.

Notes to Condensed Consolidated Financial Statements for the six months ended January 31, 2014 and January 31, 2013 (unaudited)
Canadian dollars

Incorporated (a dormant Delaware corporation). All significant intercompany balances and transactions have been eliminated.

The condensed interim financial statements were authorized for issue by the Board of Directors on March 24, 2014.

4. SIGNIFICANT ACCOUNTING POLICIES

There have been no changes to the accounting policies used by the Company since the date of the last audited annual consolidated financial statements.

5. FINANCIAL INSTRUMENTS - RISK MANAGEMENT

Financial instruments are agreements between two parties that result in promises to pay or receive cash or equity instruments. The Company classifies its financial instruments as follows: cash is classified as FVTPL, receivables (excluding HST) are classified as loans and receivables, accounts payable and accrued liabilities and amounts due to related parties are classified as other financial liabilities. The carrying values of receivables, accounts payable and accrued liabilities, and amounts due to related parties approximate their fair values due to their short term to maturity.

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk.

(a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's cash is held in Canadian financial institutions with strong credit ratings. The Company does not have any asset-backed commercial paper. The Company has minimal credit risk.

(b) Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. During the six months ended January 31, 2014, the Company entered into shares-for-debt agreements to settle liabilities of \$281,051. At January 31, 2014, the Company has cash of \$17,824 (July 2013 - \$37,403), which is not sufficient to meet its short-term business requirements. At January 31, 2014, the Company has accounts payable and accrued liabilities of \$114,737 (July 31, 2013 - \$277,219) and amounts due to related parties of \$44,062 (July 31, 2013 - \$130,682). Accounts payable and accrued liabilities have maturities of 30 days or less. Amounts due to related parties have no specified terms of payment.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on capital. The Company is not currently exposed to any material market risks.

6. CAPITAL MANAGEMENT

The Company considers its capital to be comprised of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares. Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will continue this method of financing due to the current difficult market conditions. In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. Management reviews the capital structure on a regular basis to ensure that the above objectives are met. The Company's capital is not subject to any externally imposed capital requirements. There have been no changes to the Company's approach to capital management during the period ended January 31, 2014.

7. EQUIPMENT

The Company disposed of all its equipment during the year ended July 31, 2013. Pending re-commencement of exploration activities the Company has not yet acquired any other equipment.

8. RECLAMATION DEPOSIT

The reclamation deposit in respect of a previously relinquished option to a mineral property interest in Canada in the amount of \$10,000 was redeemed during the six months ended January 31, 2013. The Company does not currently hold any reclamation deposits.

9. MINERAL PROPERTY INTERESTS

Notes to Condensed Consolidated Financial Statements for the six months ended January 31, 2014 and January 31, 2013 (unaudited)
Canadian dollars

During the six months ended January 31, 2014 the Company was not actively working on any mineral property interests. The following notes apply to the comparative period:

(a) Ten Mile Creek, Yukon Territory

During the year ended July 31, 2013 a camp owned by the Company at the Ten Mile Creek property was demobilized and the remaining value was written off.

(c) South West Yukon

During the year ended July 31, 2013 three claim groups in south west Yukon whose value had been written down to \$3 were disposed of in terms of a debt settlement with a former director; the Company recorded a gain on disposal of mineral properties in the amount of \$19,997.

(d) Rurembo Prospecting License, Republic of Rwanda

In July 2012, the Company signed a letter of intent with a group of private Canadian investors and secured an option to acquire a 100% interest in the Rurembo Prospecting License in the Republic of Rwanda. During the year ended July 31, 2013, the Company capitalized \$592,943 in personnel, travel, administration, and camp and option costs. Following the abandonment of the option agreement the Company wrote off its investment on the property during the year ended July 31, 2013.

(e) Other Properties

(i) Sleitat Mountain, Alaska

During the year ended July 31, 2013, the Company sold its 20% interest in the Sleitat Mountain tin-tungsten-silver deposit near Dillingham, southwest Alaska, for proceeds of \$60,000 and recorded a gain on disposal of mineral properties in the amount of \$59,999.

(ii) Quirk Creek, Alberta

The Company held a petroleum and gas interest in the Quirk Creek region of Alberta from which it received a royalty during the six months ended January 31, 2014 of \$3,914 (2013 - \$3,576). On November 19, 2013 the Company sold its interest for \$56,250. The proceeds were used in part to settle Company indebtedness.

Environmental issues

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation.

SOLOMON RESOURCES LIMITED
(An Exploration Stage Company)

Amended & Restated

Notes to Condensed Consolidated Financial Statements for the six months ended January 31, 2014 and January 31, 2013 (unaudited)
Canadian dollars

The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company. As at January 31, 2014, the Company has no known obligations in respect to any of its former properties.

Realization of assets

The investment in and expenditures on mineral properties comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal. Resource exploration and development is highly speculative and involves inherent risks. While the rewards if an ore body is discovered can be substantial, few properties that are explored are ultimately developed into producing mines. There can be no assurance that current exploration programs will result in the discovery of economically viable quantities of ore. The amounts shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values. These costs will be depleted over the useful lives of the properties upon commencement of commercial production or written off if the properties are abandoned or the claims allowed to lapse.

Title to mineral property interests

Although the Company takes steps to verify the title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

10. SHARE CAPITAL

- (a) Authorized - Unlimited common shares without par value
- (b) Issued

Common shares without par value	Number of shares	Capital stock
January 31, 2013	41,313,972	\$ 30,149,432
July 31, 2013	48,313,972	\$ 30,281,800
January 31, 2014	53,934,992	\$ 30,358,067

During the six months ended January 31, 2013 14,644,000 new common shares were issued pursuant to a private placement that closed in two tranches (September 24 and October 31, 2012). Gross proceeds of \$732,200 were raised, of which \$300,000 had been received prior to July 31, 2012. The total legal, filing and brokerage cost of the issue, including the calculated value of finder warrants, was \$49,675.

During the six months ended July 31, 2013 (a) 6,000,000 new common shares were issued pursuant to the Company's letter of intent in respect to the Rurembo property in Rwanda (see note 7(d)) with a deemed value for the purposes of the agreement of \$300,000 and a fair value for accounting purposes of \$120,000; and (b) 1,000,000 new common shares were issued pursuant to a debt settlement agreement with the former Chief Executive Officer with a deemed value of \$50,000 and a fair value of \$15,000.

SOLOMON RESOURCES LIMITED
(An Exploration Stage Company)

Amended & Restated

Notes to Condensed Consolidated Financial Statements for the six months ended January 31, 2014 and January 31, 2013 (unaudited)
Canadian dollars

During the six months ended January 31, 2014 5,621,020 new common shares, with a fair value for accounting purposes of \$84,315, were issued to settle liabilities in the amount of \$281,051 leading to the Company recording a gain of \$196,739. Included in the settlement was the issue of 2,791,761 new common shares issued to directors and a former director, officers, a relative of a former director and a law firm of which a director is a partner.

(c) Stock options

The Company has an incentive stock option plan (the "Plan") that allows it to grant share purchase options to its employees, directors, consultants and management company employees. Under the terms of the Plan, the exercise price of each option will not be lower than the lowest exercise price permitted by the TSX-V (currently \$0.10). The Plan allows for a maximum of 10% of outstanding shares to be issued under the Plan. The Plan is subject to annual shareholder approval.

Options have a maximum term of five years and terminate up to 90 days following the date on which an optionee ceases to be an employee, director, consultant or management company employee, and up to 30 days following the date on which an optionee who is engaged to provide investor relations activities ceases to be engaged to provide such services. In the case of the death of an optionee, the options terminate at the earlier of 12 months after the date of death and the expiration of the option period. Vesting of options is determined by the Board of Directors at the time the options are granted. Options issued to consultants providing investor relations activities must vest in stages over twelve months with no more than one-quarter of the options vesting in any three-month period.

Stock option activity was as follows:

	Number of Options Outstanding	Exercise Price	Weighted Average Exercise Price
Balance, July 31, 2012	2,260,000	\$ 0.10 to \$ 3.60	\$ 0.25
Granted	1,300,000	\$ 0.10	\$ 0.10
Expired/Cancelled	(20,000)	\$ 3.60	\$ 3.60
Balance, July 31, 2013	3,540,000	\$ 0.10 to \$ 2.50	\$ 0.18
Granted	0	0	0
Expired	(55,000)	\$2.50	\$2.50
Balance, January 31, 2014	3,485,000	\$ 0.10 to \$ 0.265	\$ 0.14

The value of options awarded is calculated using the Black Scholes method and expensed in the period of the award.

SOLOMON RESOURCES LIMITED
(An Exploration Stage Company)

Amended & Restated

Notes to Condensed Consolidated Financial Statements for the six months ended January 31, 2014 and January 31, 2013 (unaudited)

	\$ 1	\$ 1

16. EVENTS AFTER THE REPORTING DATE

On March 21, 2014, the Company and Helio Resource Corp (“Helio”) have entered into a Letter Agreement, whereby Solomon can earn up to a 60% interest in Helio’s Damara Gold and Tin Project (DGP) in Namibia.

Subject to TSX Venture Exchange (the “Exchange”) approval, the principal terms of the two-stage agreement are as follows:

- Solomon can acquire an initial 51% interest (Stage 1) by issuing an aggregate 15,000,000 common shares and completing \$1,500,000 in exploration expenditures over a 3 year period
- Solomon can acquire an additional 9% interest (Stage 2) by issuing an additional 5,000,000 common shares and completing a further \$1,500,000 in exploration expenditures in year 4.

The DGP Property is comprised of 2 exploration licenses covering 722km² located in Namibia, South Africa.
